**Computer methods  
in applied  
mechanics and  
engineering**

## Contents Volume 124

### Volume 124, Nos. 1–2, 15 June 1995

- A new finite-difference algorithm for computing the boundary layer flow of viscoelastic fluids in hydromagnetics  
*P.D. Ariel* 1
- A new upwind scheme on triangular meshes using the finite volume method  
*P. Tamamidis* 15
- An improved constant membrane and bending stress shell element for explicit transient dynamics  
*S.W. Key and C.C. Hoff* 33
- Progressive failure analysis of composite plates by the finite strip method  
*M.S. Cheung, G. Akhras and W. Li* 49
- On the stability and instability regions of non-conservative continuous system under partially follower forces  
*A.M. Gasparini, A.V. Saetta and R.V. Vitaliani* 63
- Partitioned procedures for the transient solution of coupled aeroelastic problems. Part I: Model problem, theory and two-dimensional application  
*S. Piperno, C. Farhat and B. Larrouturou* 79
- The patch test as a validation of a new finite element for the solution of convection–diffusion equations  
*R. Sacco, E. Gatti and L. Gotusso* 113
- Assessment of computational models for sandwich panels and shells  
*W.S. Burton and A.K. Noor* 125
- Incompressible Navier–Stokes computations with SUPG and GLS formulations—A comparison study  
*S.K. Hannani, M. Stanislas and P. Dupont* 153
- Hexahedral meshing using midpoint subdivision and integer programming  
*T.S. Li, R.M. McKeag and C.G. Armstrong* 171

### Volume 124, No. 3, July 1995

- A linear nonconforming finite element method for nearly incompressible elasticity and Stokes flow  
*R. Kouhia and R. Stenberg* 195

An adaptive finite element algorithm for a two-dimensional stationary Stefan-like problem <i>M. Picasso</i>	213
Steady state incompressible flows using explicit schemes with an optimal local preconditioning <i>M. Storti, N. Nigro and S. Idelsohn</i>	231
A comparison of optimality criteria methods for stress and displacement constraints <i>M. Zhou and R.T. Haftka</i>	253
Computer simulations of critical, non-stationary granular flow through a hopper <i>G.A. Kohring, S. Melin, H. Puhl, H.J. Tillemans and W. Vermöhlen</i>	273
<b>Volume 124, No. 4, August 1995</b>	
A high-order streamline Godunov scheme for steady supersonic flow computation <i>C.A. Hsu and J.Y. Yang</i>	283
Diagnosis of local uncertain modifications in the boundary conditions of a rectangular plate via convex modeling <i>I. Elishakoff and J. Fang</i>	303
Solitary wave solutions of the MKdV <sup>-</sup> equation <i>L.R.T. Gardner, G.A. Gardner and T. Geyikli</i>	321
Stability and error analysis for time integrators applied to strain-softening materials <i>M. Kulkarni, T. Belytschko and A. Bayliss</i>	335
A two dimensional bi-cubic B-spline finite element: used in a study of MHD-duct flow <i>L.R.T. Gardner and G.A. Gardner</i>	365
